

A CAP AND TRADE DEBATE

IS CAP AND TRADE WORKING AS A WEAPON AGAINST CLIMATE CHANGE?

REUTERS

Cap and trade is now in its sixth year as the European Union's flagship policy to fight climate change, and has successfully driven carbon emission cuts and created a multi-billion-Euro market. But the market has had its critics, and similar schemes have faltered in the United States, Japan and Australia.

Join **Thomson Reuters and Point Carbon** to discuss and debate:

- Can markets clean up our atmosphere
- How can carbon trading be improved
- Is cap and trade inescapable
- Is it right or moral to create rights to pollute

Opening address:

Dr. Nelson Sam – Global Managing Director, Advisory Services, Point Carbon

Exploring the themes will be:

Sarah-Jayne Clifton – Climate campaigner, Friends of the Earth

Michael Grubb – Chair of the Climate Strategies Research Organisation, Cambridge University

Jutta Kill – Forest and climate change campaigner, FERN

Abyd Karmali – Managing Director and Global Head of Carbon Markets at Bank of America Merrill Lynch

Gwyn Prins – Research Professor at the London School of Economics

Moderator:

Gerard Wynn – Senior Environmental Markets Correspondent, Thomson Reuters
